Career Objective

AWS Cloud and DevOps fresher with hands-on experience in AWS, Terraform, Docker, Jenkins, GitHub Actions, Kubernetes, Linux, and CI/CD. Skilled in cloud infrastructure, Infrastructure as Code (IaC), containerization, networking, monitoring, and deployment automation through practical projects. Seeking an entry-level AWS Cloud/DevOps Engineer role to apply cloud and DevOps skills in building, deploying, and managing reliable infrastructure.

Education

Institute of Industrial and Computer Management and Research (IICMR), Nigdi, Pune
Master of Computer Applications (MCA) | SGPA**: 7.96**
2025 – Expected 2027
LPP Institute of Management Studies andTechnology,Chh.Sambhajinagar
B**achelor of Computer Science (B.Sc. Computer Science) | 81.25%**
2022 – 2025

Projects

Jenkins CI/CD Pipeline with Docker | AWS EC2, Jenkins, Docker, GitHub

- Built a CI/CD pipeline using Jenkins hosted on an AWS EC2 instance and integrated it with a GitHub repository
- Configured Docker as a Jenkins build agent to provide an isolated and reproducible build environment
- Automated application build and deployment workflow through Jenkins and GitHub integration
- Applied CI/CD and containerization concepts to improve deployment efficiency and consistency

AWS VPC Complete Architecture | AWS VPC, EC2, Subnets, NACL, Security Groups

- Designed and implemented a complete AWS VPC architecture with public and private subnets
- Configured Internet Gateway, NAT Gateway, route tables, Security Groups, and Network ACLs for controlled network communication
- Deployed EC2 instances across public and private subnets and configured secure connectivity between resources
- Implemented a bastion host architecture for secure access to private EC2 instances

Terraform AWS Infrastructure | Terraform, AWS EC2, Variables, tfvars

- Provisioned AWS infrastructure using Terraform following Infrastructure as Code (IaC) principles
- Used Terraform variables and .tfvars files to manage configurable infrastructure parameters
- Performed the complete Terraform lifecycle using terraform init, terraform plan, terraform apply, and terraform destroy
- Practiced repeatable and automated infrastructure provisioning using Terraform

AWS CloudWatch EC2 Monitoring | CloudWatch, EC2, SNS

- Configured CloudWatch monitoring for EC2 CPU utilization.
- Created CPU utilization alarms based on defined thresholds.
- Configured email notifications for alarm events using Amazon SNS.

Technical Skills

Cloud: AWS (EC2, VPC, S3, IAM, RDS, DynamoDB, Lambda, CloudFront, Elastic Load Balancer, Auto Scaling, cloudWatch ECS , EKS , CodeCommit , CodeBuild , Codedeploy , SNS
DevOps: Jenkins,GitHubActions,CI/CD,Docker,DockerCompose,Git,GitHub,Kubernetes
Infrastructure as Code: Terraform, Variables, tfvars, Terraform lifecycle
Linux: SSH, networkingcommands,processes,filepermissions,users&groups,volume management
Programming: Python, Java, C, Bash, SQL, HTML, CSS, JavaScript
Databases: MySQL, MongoDB, PostgreSQL
Tools: VS Code,Postman,GitHub

Certifications&Training

IBM Cloud Essentials — IBM SkillsBuild | Apr 2026
Oracle AI Foundation — Oracle University | Nov 2025
